Pochamma maidan.

2018-2020

879Marks

SSC.

Platinum Jubilee High School,
Warangal.

2017-2018

8.7CGPA

PROJECT

Music recommendations by Facial Emotions

- Developed an advanced web application utilizing Python with the Flask framework to deliver personalized music recommendations based on real-time facial expressions.
- This project combines emotion recognition technology trained on the dataset with live webcam feed to predict user's emotions in real-time.
- Using Spotipy wrapper, it fetches personalized playlists from Spotify based on the detected emotion, enhancing user experience with tailored music recommendations displayed on-screen.

Crime Control Center through Online using Angular JS

- Implemented secure internet-based crime reporting applications, enabling anonymous complaints and reducing reliance on physical visits to police stations.
- HTML, CSS, Bootstrap and angular JS are the main technologies used.
